- and many more ...

PROQOS - REQUIREMENTS

PANEL Windows 7+, Framework .NET 4.5+ **WEBSITE** Linux or Windows with PHP, MySQL or MariaDB

DEPARTMENTS NETWORK

ProQoS allows You to expand Your business beyond the boundaries.

It is not only sales to the another country, like other softwares do.

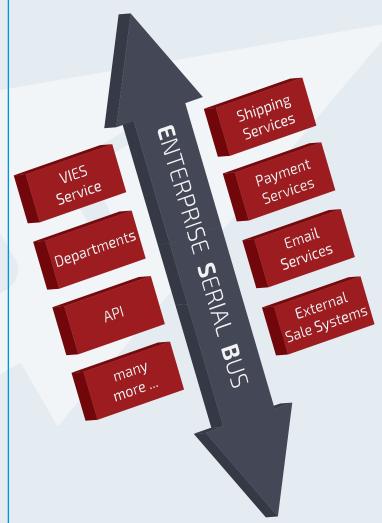

You can open **REAL** department in another country, install and start selling locally.

Departments can cooperate by using his data. Each one creates international sales network.

ESB - ENTERPRISE SERIAL BUS

ProQoS system contains ESB, that integrate with many external services.

ESB architecture allows to connect with software of your suppliers or even competitors.

Inside ESB are background processes, that are monitoring, analysing and controlling the data.

ESB is mainly used in large companies like Banks, Telecommunication.
